

Joe Pye “Gateway”

Eupatorium maculatum “Gateway”

Gateway Joe Pye is a cultivar we have used for years for its beautiful foliage, deep rose color, and its well-mannered habit. Grows up to 4 feet tall. About 2 feet round at the base, but 4 feet wide at the top. Great underplanted with any of the Bluestars, Helen's Flower, Wild Bergamot, Self Heal. A showstopping, long-lived native.

Fantastic habitat plant that is frequented by flocks of butterflies and other pollinators, Joe Pye is deer resistant, tolerates wet to average soils, clay adapted, and disease free
