

Purple Giant Hyssop

Agastache scrophulariifolium

Very similar to the more familiar Anise Hyssop, but much longer spires of bloom and much taller, growing to 6 feet tall and 2-3 feet wide.

Sun to part shade.

Highly deer resistant.

Clay adapted. Very drought tolerant once established.

Short lived perennial that will live 2-3 years, but reseeds to establish a population.

This is a dramatic plant that looks great toward the center or rear of any habitat garden. Its always covered with bees and butterflies, and birds love the multitude of seeds it produces.
